#### Creating Folders & Files, along with exploration of different parameters

```
# Creating folder "GoCloudEasily"
```

```
New-Item -Path \ -Name "GoCloudEasily" -ItemType directory
```

```
# Setting folder "GoCloudEasily" as current Working Directory
```

```
cd C:\GoCloudEasily
```

```
# Creating Folders in bulk
```

```
"Folder1","Folder2"| %{New-Item -Path C:\GoCloudEasily -Name $_ -ItemType  
directory}
```

```
# Creating file "MyFile.txt" in folder "GoCloudEasily" (Current Working Directory)
```

```
New-Item -Path . -Name "MyFile.txt"
```

```
# Creating Text Files in bulk
```

```
1..5| %{New-Item -Path .\Folder1 -Name $("File" + $_).txt}
```

```
# Exploring different parameters for creating files & Folders
```

```
New-Item -Path .\Testfolder -Name "MyFile1.txt" -force
```

```
New-Item -Path .\Testfolder -Name "MyFile1.txt" -Confirm
```

```
New-Item -Path .\Testfolder -Name "MyFile1.txt" -WhatIf
```

```
